

TL

TENSIONER

EVEN SAFER WITH AUTOMATIC POST-TENSIONING

ExTe

Securing cargo. We invented the concept.

ROBUST

Automatic post-tensioning

During transportation, the automatic post-tensioner maintains the necessary tension for maximum safety.

Weight: 15 kg

Tractive force: up to 450 kg

WE LISTEN, BUILD AND TEST.

At ExTe, listening to ideas and feedback from hauliers, drivers and body builders is in our genes. It is often the basis for the development of new products with unique, practical solutions. All new products undergo extensive testing, both in the laboratory and through extensive trial use in practice, before they are released into the market. All in the name of maximising safety and functionality.

A COMPACT, ROBUST, SIMPLE AND RELIABLE TENSIONER.

The TL tensioner, like its predecessor the Grizzly, was designed to be fitted inside the bolsters of trailers and trucks, where it is shielded from the elements. The tensioner's position inside the bolster means that it is easy to fit to the trailer, where space is limited. Furthermore, a specially-designed mount makes it easy to attach the tensioner to the chassis. This is also the case for reduced-height truck chassis.

As the TL tensioner is permanently fitted to the bolster, it does not follow the hydraulic movements of the bunks.

A NETWORK OF DISTRIBUTORS

ExTe has a well-established network of distributors around the world. This is who hauliers should contact in the first instance. Most of the distributors are qualified body builders and service technicians, and are located near the hauliers. That is where the most common products and spares will be in stock. But it goes without saying that everyone is welcome to contact the ExTe sales team directly.

TECHNICAL SUPPORT

ExTe's Technical Support team is global and they are always available for hauliers, body builders and service technicians. In the event of a problem, things can usually be resolved over the phone straight away. An important function for our Technical Support team is carrying out planned and preventative inspections at the hauliers. The Technical Support team is also usually involved the first time an upfitter installs an ExTe product, in addition to providing training for assembly and warehouse staff.

WE OWN THE PATENTS

"Securing cargo. We invented the concept." And we have been coming up with solutions to improve safety and quality for hauliers since 1898. Today, ExTe has a wide range of unique, patented solutions. ExTe's patent symbol indicates something unique and which is only available from ExTe. That ExTe has something which no-one else has.

SAFETY IS OUR BRAND.

ExTe is the world's leading manufacturer and supplier of timber bunks and automatic tensioners. For more than 100 years, we have been developing and delivering products for safely securing the timber loads being transported along our roads and railways.
